

The Congo Clinic Initiative

ACCESS TO CLEAN WATER

COMMUNITY MEETINGS

Through community meetings, clinic doctors and local leaders discuss health and hygiene, identify issues, brainstorm assets, and develop plans to build and maintain the water source.

LOCAL OWNERSHIP

At the will of the community, the water projects move forward. The community contributes materials, labor, skills, and funds.

CCI SUPPORT

Clinic Initiative funds are used to support the work by bringing in Congolese technicians, purchasing materials as needed, furthering training, and transportation costs.

SUSTAINABILITY

The community and clinics maintain the water source by training others and using local resources.
