

The Congo Clinic Initiative

Medicines

Medicines are fully stocked in all clinics.

Solar Lighting

Solar panels are installed on clinics and hospitals.

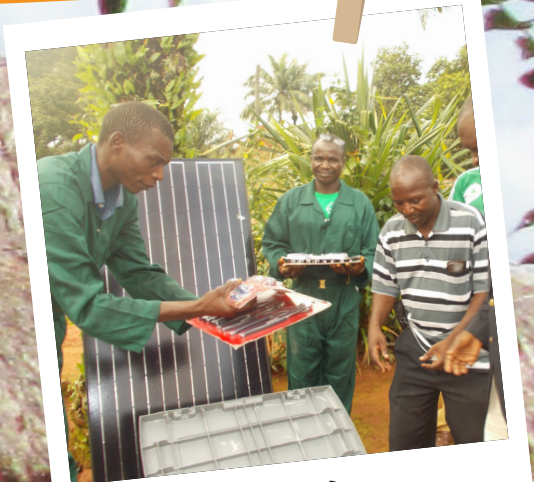

Vaccinations

Support goes toward the costs associated with vaccination campaigns.

Medical Supplies

Medical supplies are used for diagnosing, treatments, and surgery.

Salaries

Technicians are paid to install, repair, and set up reporting systems for needed repairs.

Refrigeration

Solar refrigerators are repaired or replaced.

Transporting

Funds are used to transport equipment to rural clinics (because roads are very bad!).

Staff Development

Nurses participate in monthly staff development sessions to improve their quality of care.

CHE

Community Health Evangelism (CHE) transforms lives through integration of evangelism, discipleship, disease prevention, and community owned development.

Rebuilding

If needed, some clinics will be rebuilt.
