

CONGO CLINIC EXPERIENCE

Welcome! Take some time to look around
and learn about medical care in Congo.

The Covenant Church in Congo operates 108 clinics. Currently these clinics operate without electricity or clean water, and limited pharmaceuticals are available only intermittently.

To address this injustice, Paul Carlson Partnership has started the Congo Clinic Initiative. Together with 108 partners for 108 clinics, we can raise the standard of medical care in Congo.

paulcarlson.org/cci

NEEDED!

Solar energy is needed
for the 108 clinics that have
never had electricity.

DOCTOR IS OUT

But please come in!
Take some time to look around.

WAITING AREA

Some larger clinics have waiting areas with chairs, or just a thatched roof to stand under out of the rain.

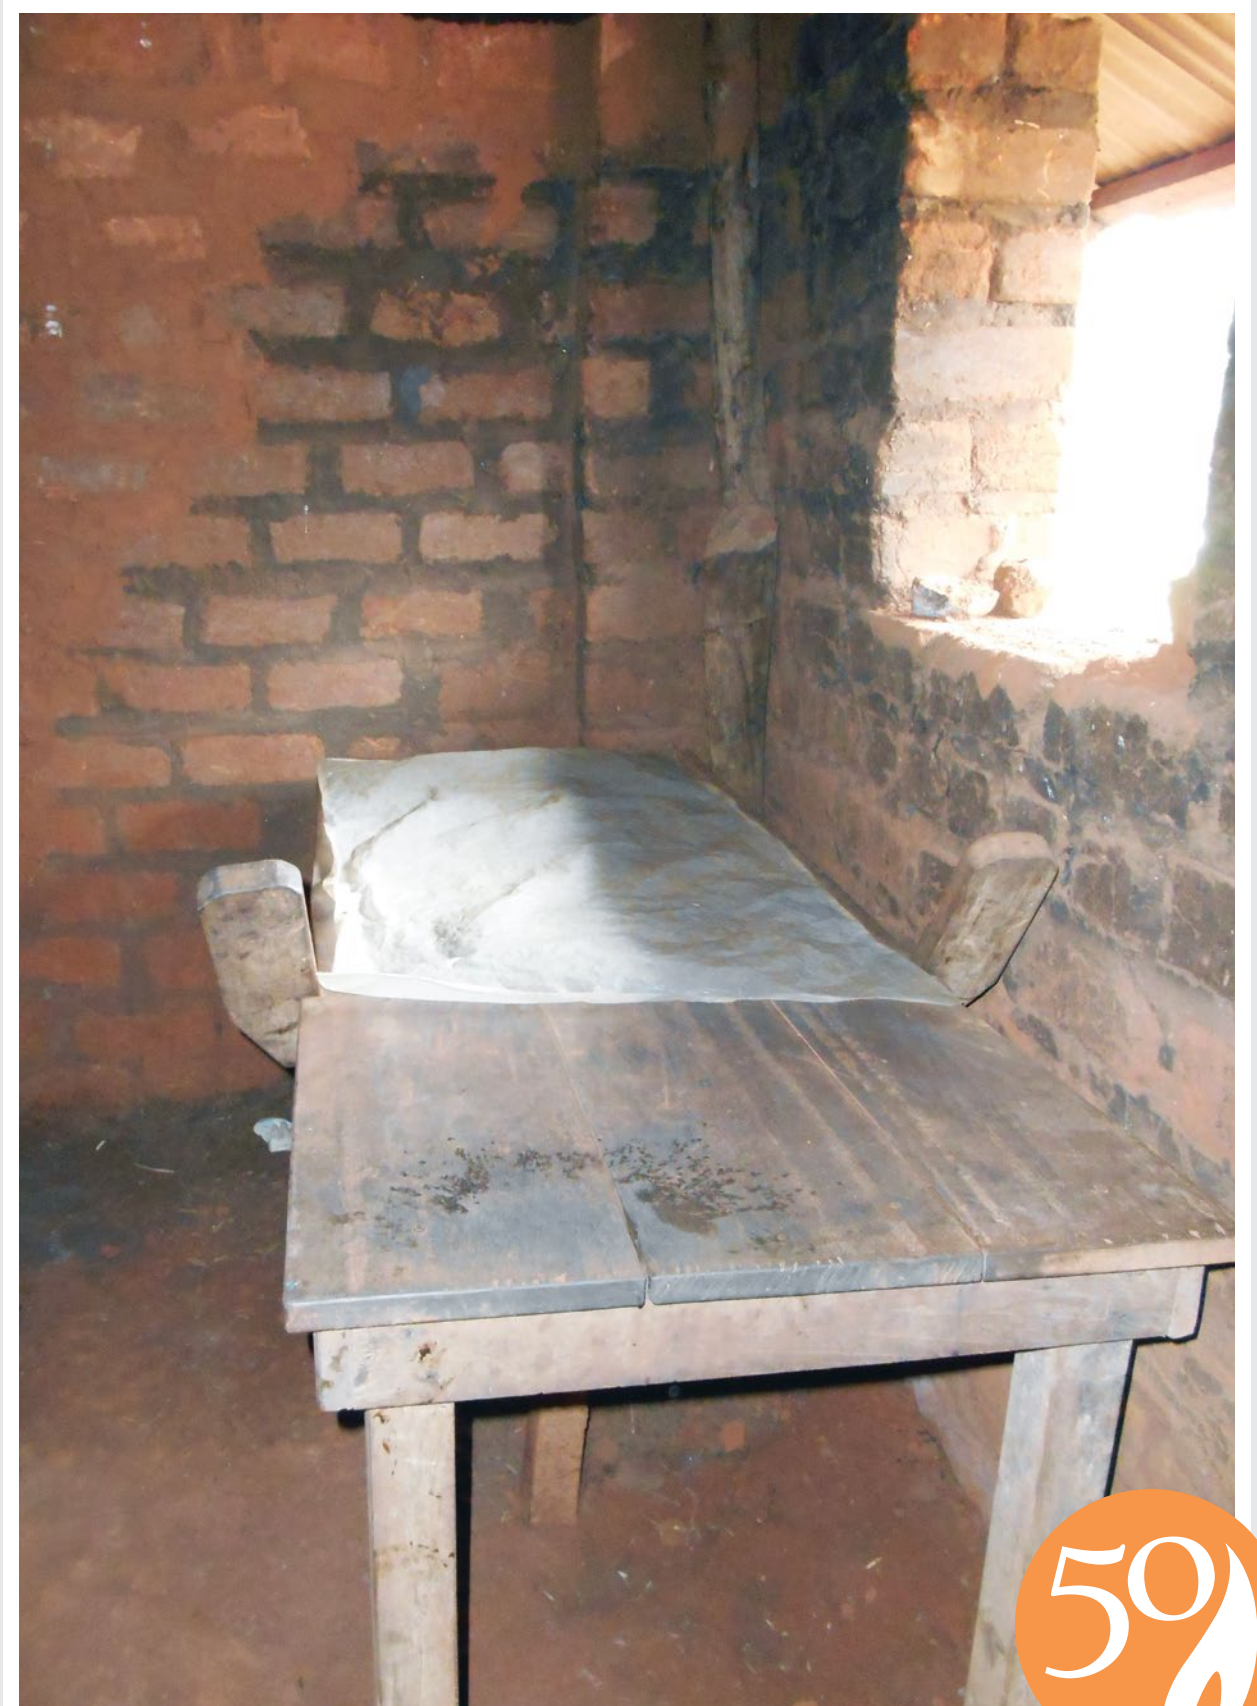

INPATIENT AREA

When you visit the clinic,
bring your own grass mat
to lay on the floor.

BIRTHING AREA

Women in Congo give birth on a wooden table.

SUPPLY CABINET

In the jungle heat, many pharmaceuticals will spoil without refrigeration, which requires electricity.

TREATMENT AREA

Most common conditions treated are: Malaria; Anemia; Diarrhea & Parasites; Pneumonia & Upper Respiratory Infection; Burns; Vomiting & Dehydration
