

2023 Medical Giving Opportunities

UCare4Congo supports the entire Covenant Church of Congo (CEUM) medical system, which includes training medical professionals, providing medicines and supplies, improved infrastructure, and quality patient care. Our partners can deepen their holistic gospel ministry of caring for the whole person and entire communities through UCare4Congo.

The Covenant Church of Congo Manages

- 1.2M population
- 120 Health Centers
- 4 Health Zones
- 5 Hospitals
- 370 Beds
- 19 Physicians
- Hundreds of nurses
- Over 200 nursing students

Health Center and Hospital Map

Please consider making UCare4Congo a part of any financial gift.
These needs total \$479,000 for 2023:

Current Projects and Specialized Training Needs

Advanced Degree for ISTM Director of Nursing: \$12,000

ISTM, the college level nursing school of the Covenant Church of Congo, is in the process of maintaining its Ministry of Education credentials for a college program that now requires an advanced degree holder within the school leadership. Mr. Augustin Moleke has begun a simultaneous Master/Doctoral program that will meet these requirements and allow part of his studies to take place in Karawa while leading ISTM.

Ophthalmology Scholarships: \$23,000

Mr. Désirée Atonga Ndele and Mr. Matthieu Kangi Kafi are two nurses from the Karawa area who were chosen by the Covenant Church of Congo to attend a three year training program in ophthalmology. These two individuals were chosen based on the integrity of their Christian walk, high intellect, and commitment to return to the Karawa area where they have family. They are currently halfway through the program in Kinshasa, DR Congo. As they spend nearly a year at a time away from their wives and children, they believe God has chosen them to meet this desperate need.

Diabetes/Hypertension Curriculum: \$24,000

A resource group of PCP Medical Ambassadors is working alongside Congolese medical teams to develop new curriculum to treat diabetes and hypertension cases in DR Congo. These volunteers are seeking funds to research, design, and print the curriculum by fall 2023.

Malnutrition Stabilization Center and Training: \$30,000

The new Malnutrition Stabilization Center in Karawa was completed in 2022 and medical teams are being taught how to care for severely malnourished children. Each year the Center needs \$30,000 to operate, provide feedings, equipment, and increase trainings.
